Nostalg

Gunnar Bohlin designed the hat and shoe rack *Nostalg* in 1937. The rack has come and gone through the decades, but is today a classic in Swedish furniture history. The consoles are manufactured, as they've always been, by melted aluminum scrap and are joined with wooden staffs.

Description and Measurements

Nostalg has consoles and anchor hooks in moulded aluminium. The wooden shelves are dowels made of birch, beech or oak. The shelves are also available in powder coated or chromed steel pipes or naturally anodized aluminium pipes. The baseline measure is 1000 x 245 x 190 mm (W x D x H), but the width can either be extended by adding an additional part* or reduced by cutting off a part. The shelf is delivered disassembled in a box.
